

Crossroads: session 6

Group presentation, productivity tools, and Q&A session

Question from last week

- Everyone gets the same problem!
- Think of something interesting that you can develop into a business; bring up something fun! or crazy!
- Turn it into a business proposal
- Each group needs a powerpoint, google “startup pitch deck” if you need details or inspirations

Productivity Tools

- Not limited to “coding” tools
- “The best camera is the one you have with you”

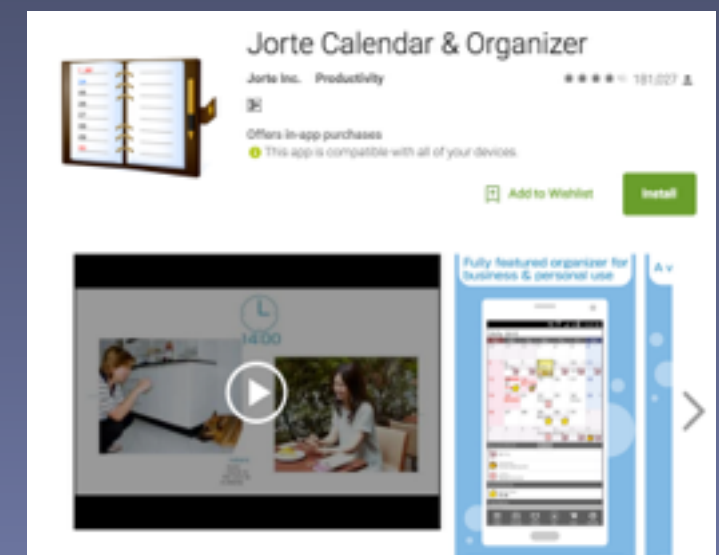

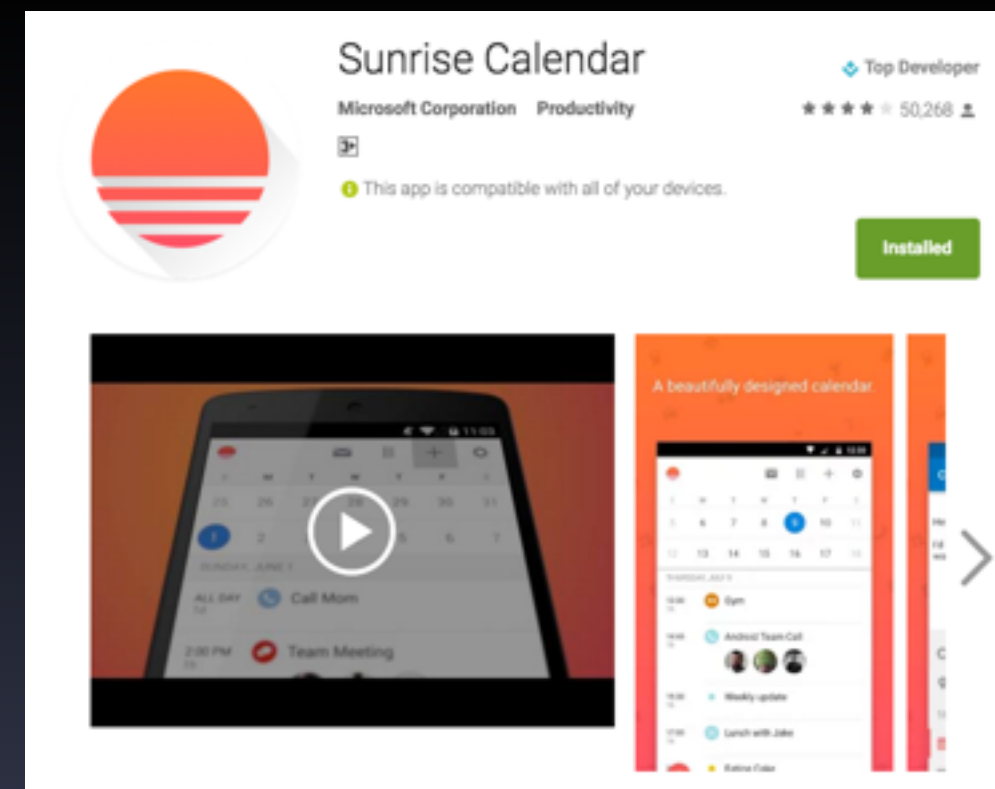

Email

- Choices for “client” and “provider”
- 2~3 addresses should cover all your needs

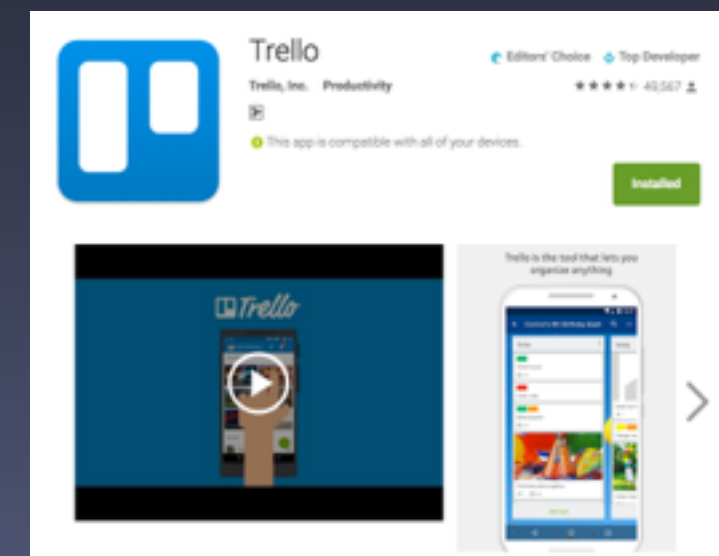

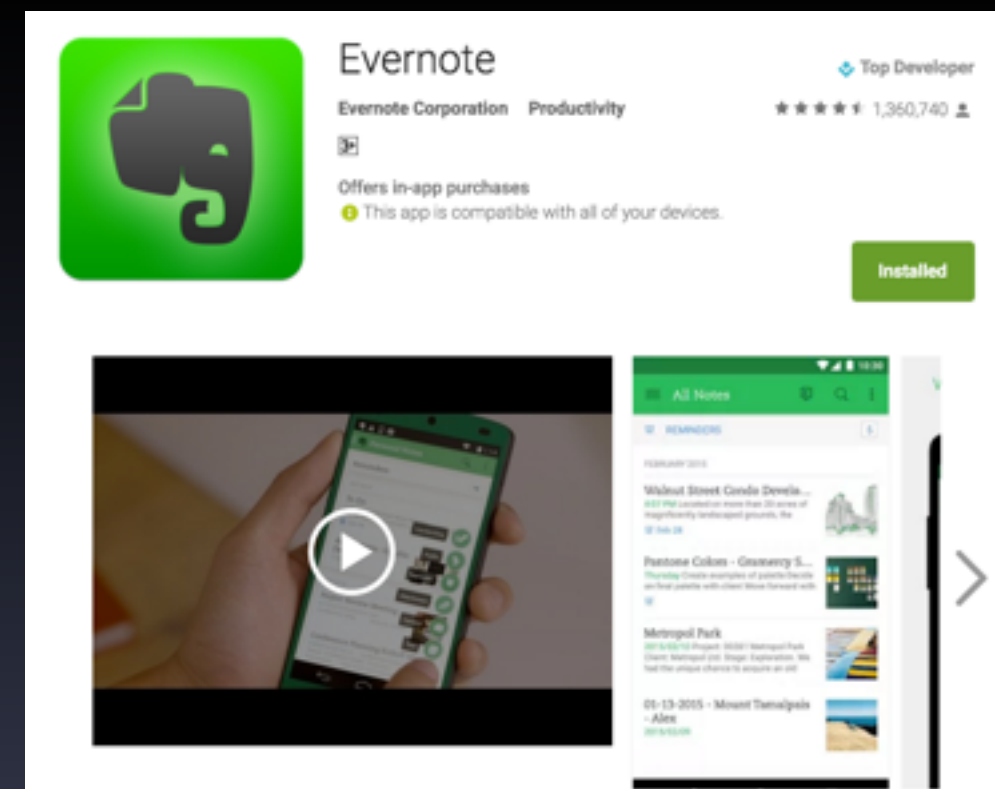

Calendar

- More or less the same, just find one you're comfortable with
- Sunrise has a good “invite” flow, which is important for me

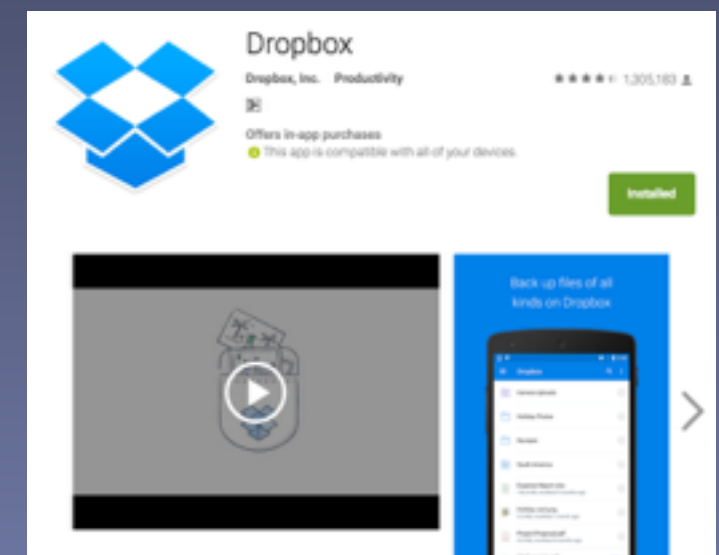

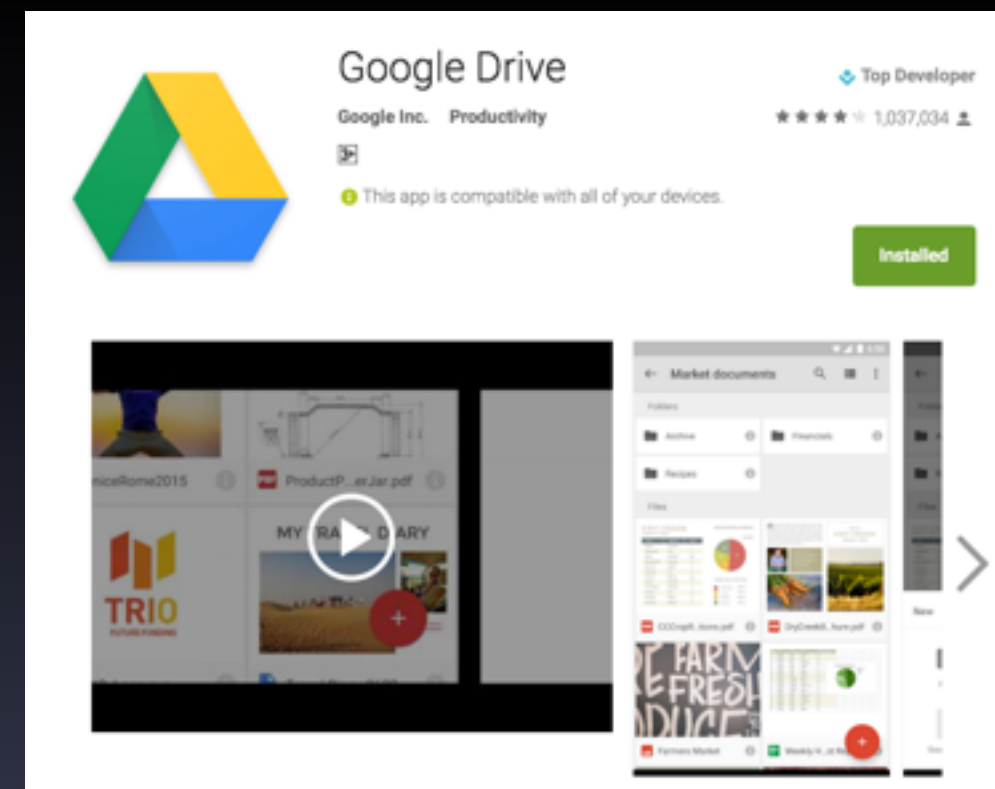

Info & PM

- Evernote is more for unstructured data
- Trello is more structured
- Compare the desktop versions as well

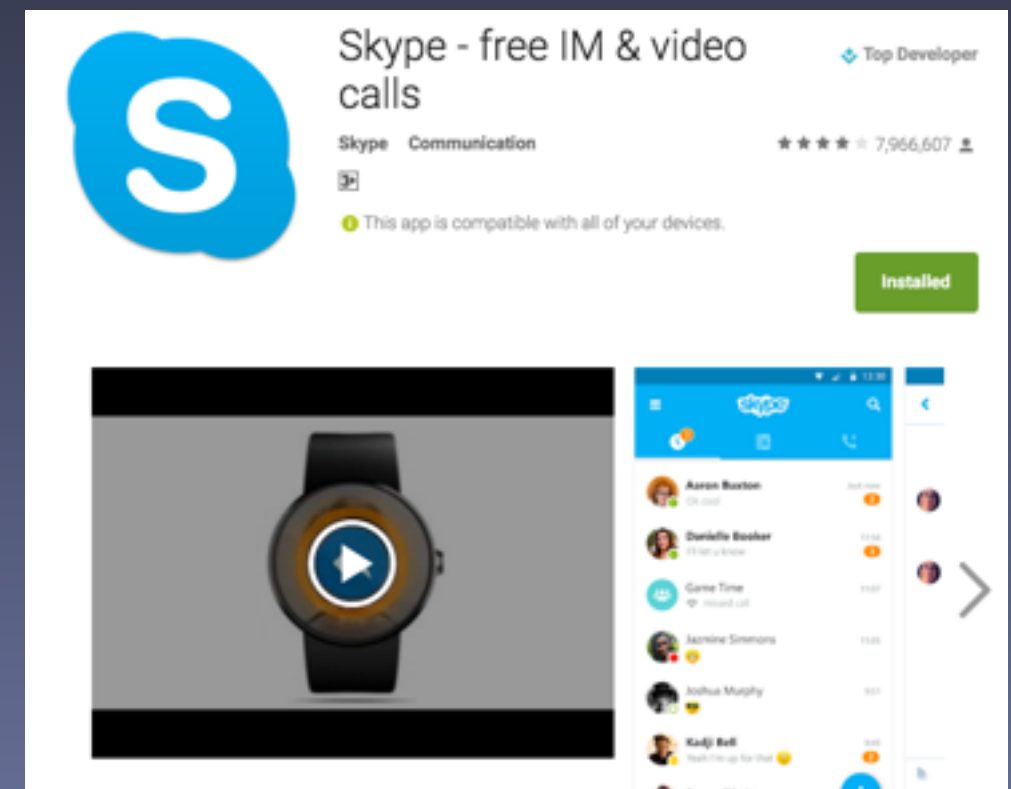

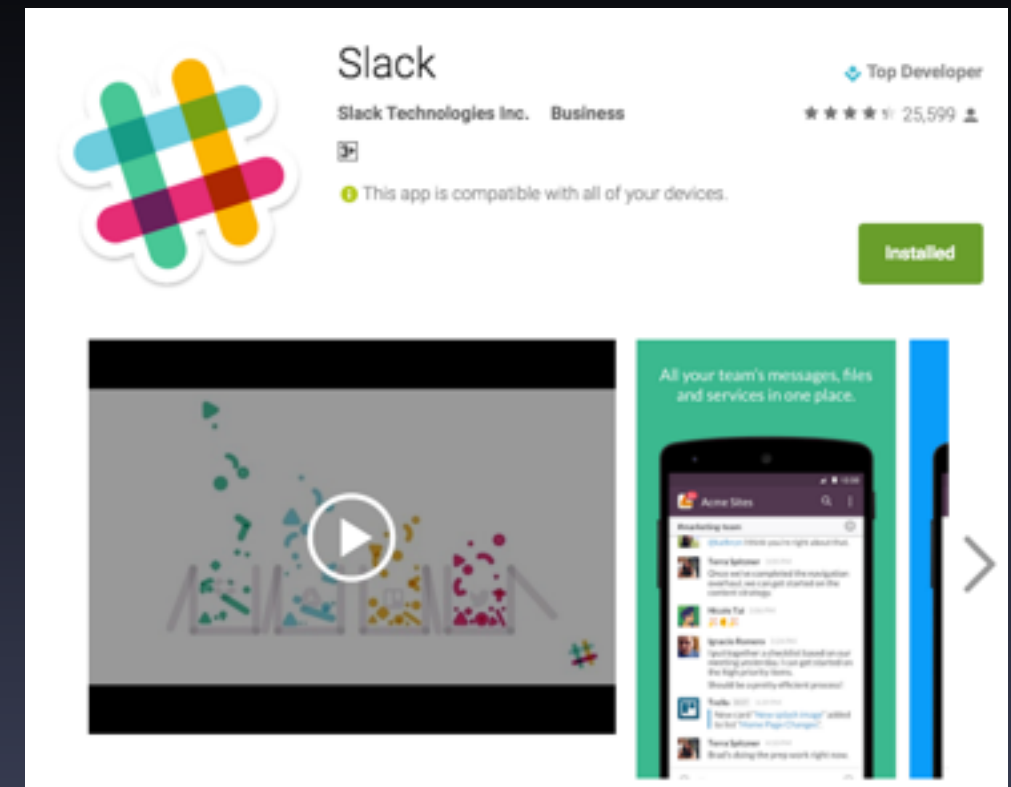

Files and resources

- Google and MS's solutions are bundled with their productivity tools
- These will also serve as decent photo management platforms

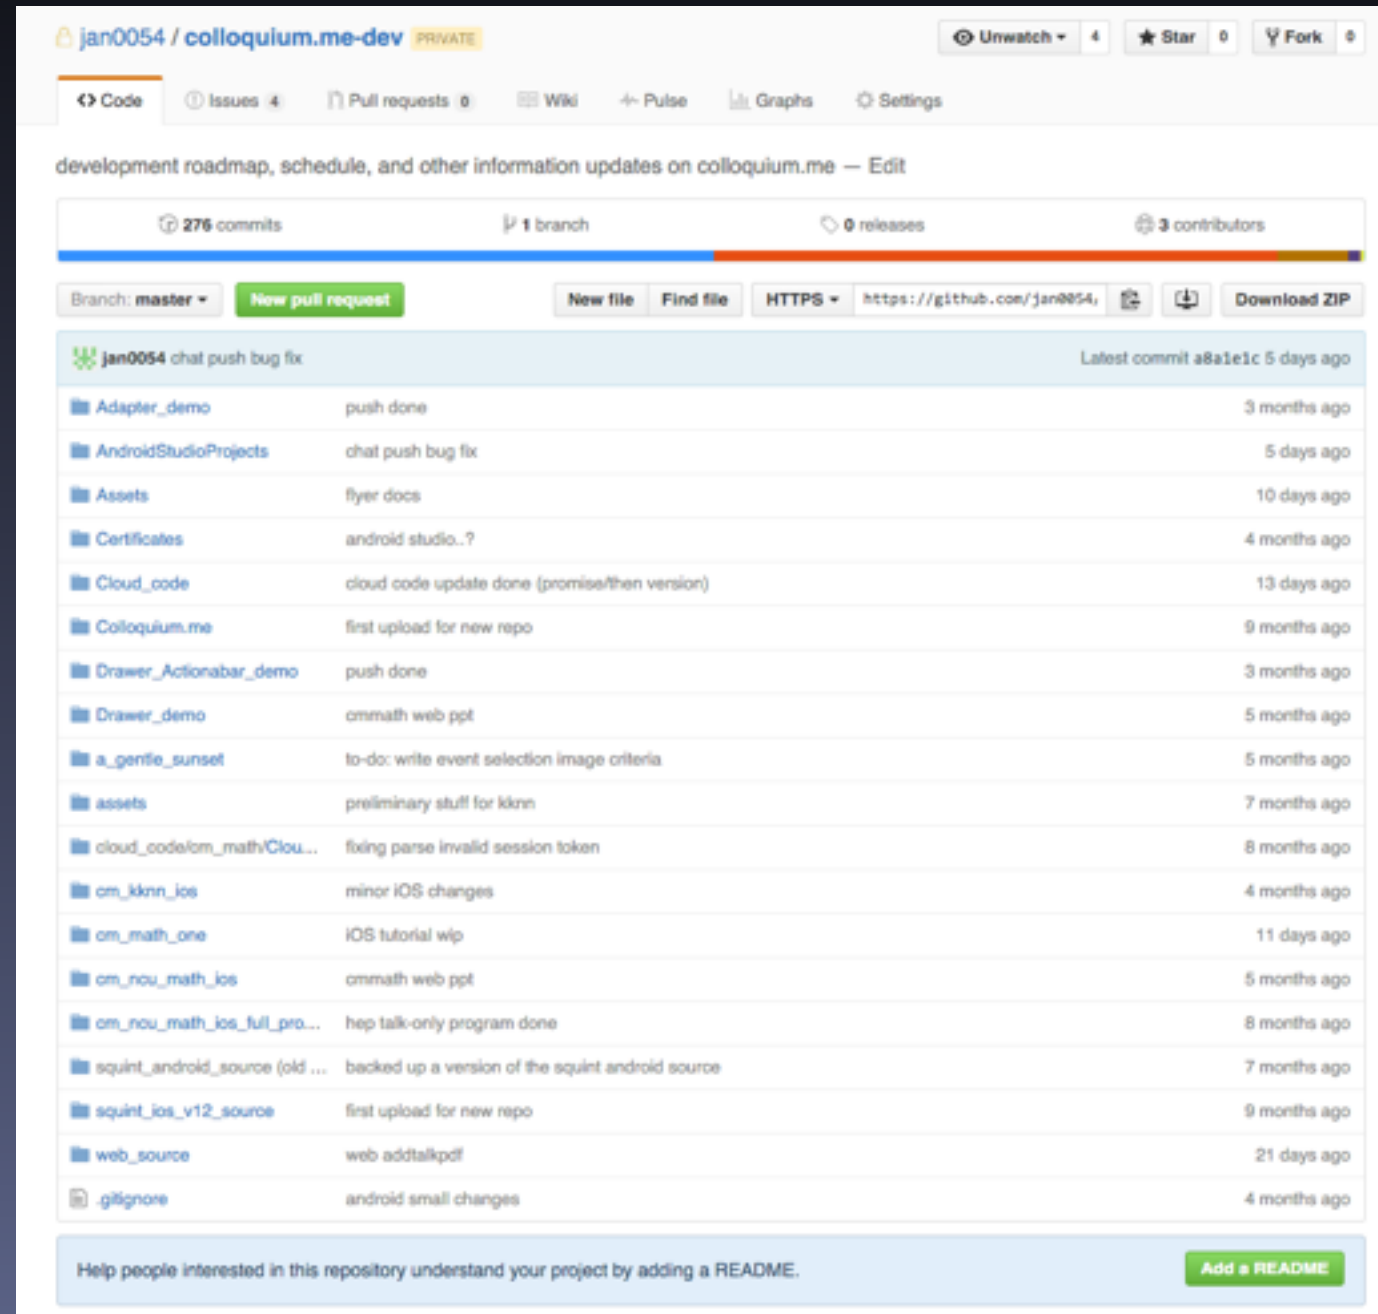

Communication

- Slack has great integration
- Skype has strong audio/video functions
- Consumer IM solutions are...not ideal

Source Control

- Github
- Conflict resolution
- Versioning
- Pay for privacy
- Others: Bitbucket..etc
